4u is a cutting edge Italian seating series designed by S.I. Design. The flowing sleek lines of this chair add to the ambiance of sophistication in any environment while also providing incredible ergonomics, comfort, and functionality. A range of back offerings in mesh, upholstered, or the newest, welded fabric “groove”, which is a sleek and comfortable hybrid of both mesh and fabric. Both white and black frames are available with matching arms and bases. 4u also offers 2 seat sizes and two seat shape options with the Euro sit and the comfort sit both available. Also available as task stools.

There’s no doubt about it. This chair is 4u.
Genie®

The award-winning Genie® series designed by Henner Jahns is Via Seating’s best-selling office chair series. The distinctive genie lamp contours promote movement by the way the back narrows at the top, which allows for upper body thoracic mobility in the shoulder area and provides great comfort and support throughout the body. This creates an important sense of “room within the chair”. Genie® offers 6 different seat sizes all within the same framework allowing for the one “look” to fit all body types in the workplace.

Run II

Embrace Run II, an ergonomic task chair or stool by Studio V. Proprietary comfort foam in a medium or large seat pairs beautifully with the 4-way stretch elastomeric mesh back with integrated lumbar support. This mesh is available in 7 colors including blue or orange patchwork patterns. Exclusive to the Run II series is a full function ergonomic synchro control mechanism with a 2:1 ratio of movement and an easy-to-use, side tension adjustment. Pair with choice of multiple height adjustable arms including a 4-way adjustable arm with sleek, textured, large cap exclusive to the Run II series. Also available with fixed loop arms for a conference seating application. The Run II series includes a high back, mid back and guest chair.

unparalleled beauty
Vero

Lines define. They make a statement. They outline what is important. So what is important to you? You want comfort. You want functionality. And you want options. Vero, by designers Orlandini Design, offers you all 3 within slick, defined lines angling cushions up an appealing back and around its seat. Sink back into Via Seating’s proprietary comfort foam injection-molded around its sturdy, metal framework. Apply 8-way adjustable arms or from a variety of textured and upholstered fixed arms. Pair it with the latest in intuitive body balance or synchro control technologies. Vero chairs are the perfect solution for executive, conference, guest and management needs.

Define your space with Vero.

SplashAir outdoor stacking stools have a full dipped-look offered in black, anthracite, white & red. Optional arms. Stacks 15 high on the floor.

Sierra cubes are outdoor single backless seats/ottomans in a bent structure of hot-dip galvanized steel bolted to the ground.

Sierra couches connect three spacious chairs with club arms on either side. Available in 5 finishes.

Tahoe chaise lounge chairs are perfect pool side, at an exclusive wellness center or at a park. This versatile seating offers choice of an upholstered head pillow.

Tahoe double seat benches offer thoughtfully designed collaborative seating. The extended backrest doubles as a place to set down coffee/tea or as a seat.

Sierra benches include a straight flat bench available with or without backrest, a curved backless bench and a curved bench available with a concave backrest or a convex backrest.

Tahoe planters are offered in 4 polyester powder coat finishes or a natural ash wood grain effect on the sides with a white or anthracite top.

Sierra tables are offered with this series’ signature tubular structure down the sides and edges of the table tops. The center has a solid, flat sheet surface.

Tahoe picnic tables connect durable, backless benches to an extensive surface of aluminum staves.

Sierra litter bins offer free-standing and bolted options. The free-standing bins are offered with open or closed tops. The mounted versions are available with single, double or triple bins.

Sierra barbecue is a fully, functional charcoal barbecue with galvanized, stainless steel wire grates. It has a removal steel liner. The bent base and work surfaces are available in 5 finishes.
VIA SEATING FOAM
(does not include ReGOLA and AERIS motion seating products)

proprietary foam technology

Via Seating chairs use closed-cell, cold-cured foam that is injection-molded into strategically contoured seat molds—owned by Via Seating. This proprietary process maximizes on lasting comfort, durability and ergonomic support.

Via Seating foam is fully covered under the 12 year warranty.

injection-molded foam

Via Seating foam is sculpted to provide body balance technology built directly in the cushioning of the seat and back. It is injected into an engineered mold at controlled, differing rates, which creates strategic, multi-density levels within each cushion. This process builds a subtle seat contour that maximizes support exactly where it is needed—where body weight is most concentrated. The outer edges by contrast, are made softer and in a waterfall slope so that the seat does not restrict circulation where the legs extend out over the edge of the seat.

expertly tested & durable

Via Seating uses a resistance factor test and measurement of density to assess the durability and quality of its foam.

Density/volume weight gives an indication of the foam’s ability to resist weight and not “bottom out.” Good foam must provide resistance in direct proportion to the amount of pressure applied. This unit of measurement does not necessarily translate into hardness but rather the feeling of support you receive when you sit on the foam.

Via Seating foam has an average density or volume of 3 pounds per cubic foot (48 kg/m3). Standard flat foam, by comparison, has a single volume weight between 1.9-2.25 pounds per cubic foot (30 to 40 kg/m3). The greater density of Via Seating foam makes it best-suited for office ergonomic seating.

closed-cell cold-cured technology

Closed-Cell refers to the fact that the foam has a smooth outer skin that is kind to fabric. It does not sip on the upholstery from the inside. The foam does not absorb moisture. It protects the foam over time and does not break down. The comfort of Via Seating foam has the same comfort 12 years later.

Cold-Cured refers to the consistency in size of the air cells within the foam. The foam is one single, contoured and resilient piece of foam. It is not layered foam.

Closed-cell cold-cured foam is injection-molded into strategically contoured seat molds—owned by Via Seating. This proprietary process maximizes on lasting comfort, durability and ergonomic support. Via Seating foam is fully covered under the 12 year warranty.
a great chair - a great world

At Via Seating, we believe great things happen in a chair. We understand that to make this happen, it takes a lot more than creating a great chair.
